Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance: None of the art searched or the references cited disclose or teach alone or in combination the method for optimizing a process model of determining the effects of components, actions on components, and results from those actions resulting in performing a structure analysis in the form of a map, and optimizing the process based upon the parallelization of components, and ascertaining a range suitable for optimization based upon the map, as recited in claim 16.

2. None of the art searched or the references cited disclose or teach alone or in combination the method for optimizing a process model of determining the effects of components, actions on components, and results from those actions resulting in performing a structure analysis in the form of a map, and optimizing the process based upon the parallelization of components, and ascertaining a range suitable for optimization based upon the map, and elimination of at least one component and introduction of a checked intermediate component, as recited in claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Relevant Prior Art

Art Unit: 2125

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ozaki (6128403) discloses a wafer structure map analysis system used to predict and analyze wafer processing, which includes manufacturing steps, quality control data, failure analysis data, and statistical quality control information.

Otte (6314413) discloses a method system for carrying out a method of process analysis and diagnosis using a neural map, which teaches an on-line optimization approach for each process step resulting in a process state optimization.

Neither of these added references include all of the steps recited in claims 16 and 17, or the same interrelationships between the steps.

4. Any inquiry concerning this communication or earlier communication from the examiner should be direct to Albert W. Paladini whose telephone number is (571) 272-3748. The examiner can normally be reached from 7:00 to 3:00 PM on Monday, Tuesday, Thursday, and Friday.
